

iButton

Modular Peripheral

The i-Button is an electronic key which permits secure user identification. It is equipped with an integrated card reader with track 1, 2 and 3. This waiter's lock is sturdy and like the other additional modules, matches the design of the terminal

- Solid metal read/write panel-mount probe for the iButton® family
 - Integrated green LED for user-feedback signaling
 - Probe guides the entry of the iButton®
 - iButton® slides over the surface to self-clean contacts
 - Accessible shallow probe cavity simplifies removal of debris such as mud
 - Probe suited for panels of up to 3mm thickness
 - Contacts made from solid 303 stainless steel with blue nylon insulation
 - Metric design, pre-wired for easy installation
 - USB interface
-
